About Me

Junior Full Stack Developer with a Diploma in Full Stack Software Development from the Code Institute (credit-rated by the University of the West of Scotland).

Bringing over 20 years of experience in customer service and hospitality combined with 14 years in personal security and close protection, I offer a rare blend of technical ability and real-world leadership, communication, and problem-solving skills developed in high-pressure, international environments across the UK and Austria.

I am proficient in HTML, CSS, JavaScript, TypeScript, Python, React, Django, and both SQL & NoSQL databases. I actively use AI tools (including Grok and Claude) for code generation, debugging, architecture decisions, and prompt engineering — allowing me to write cleaner code faster and explore best practices efficiently.

- Open to junior full stack & frontend roles
